June 2026

What's Happening This Month

This June, we are celebrating dads, grandfathers, uncles, and all the caring men who help children grow and thrive. From rough-and-tumble play to reading bedtime stories, these moments help children feel safe, loved, and connected. We know families come in many forms, and positive male involvement can make a lasting difference in a child's life.

Basics of the Month

Count, Group, & Compare!

Everyday moments are full of simple ways to build early math skills at home.

Try doing this:

- count steps
- sort toys by color or size
- measure ingredients while cooking
- compare which things are bigger or smaller.

These activities help children learn while spending fun time together!

What We're Learning

- Color: **Brown**
- Number: 6
- Shape: Rectangle
- Activity: Count, group and compare. You can do this with toys or by letting them help you in the kitchen.
